

Environmental Policy

Environmental protection is an important success factor for the added value of our automotive solutions, and at TTech Auto we care and recognize our responsibility towards our planet.

The following principles are the basis for our behavior in our daily work:’

- » We implement continuous improvement initiatives and use environmentally friendly technologies to minimize our impact on the environment.
- » We demonstrate a responsible approach to the environment and the preservation of biodiversity in all countries, regions and locations in which we operate.
- » We are committed to conserving natural resources by minimizing waste and emissions, optimizing energy, resource and water consumption and promoting efficiency and sustainability in all our operations.
- » We prioritize environmentally friendly and renewable materials from suppliers who share our commitment to environmental sustainability, ethical practices and social responsibility whenever possible and support the transition to a circular economy.
